

They took the time to meet with me in person and listen to my business requirements

After speaking to a number of companies I engaged the services of Webxpert to design my business logo/cards and Webpage.

Why TheWebxpert? A

number of reasons...They took the time to meet with me in person and listen to my business requirements and designed my logo accordingly. They were genuinely interested in my business and wanted to help me succeed.

Nothing was too much trouble for them, even when I made numerous changes to my design. All work was promptly carried out at a professional level and I was able to contact them at any time of day. For this level of service you would expect to pay more? Wrong! TheWebxpert costs were the cheapest price I was quoted. Their value for money price belies in their outstanding level of service & I would definitely recomend anyone requiring business logo & webpage design to utilise their services - you won't be dissapointed!
