

The WebXpert, we were very pleased with the friendly customer service...

StudioOat is a graphic illustration company which primarily distributes artworks. We are about design and wanted an aesthetically pleasing website which is simple to administer and navigate.

When we approached The Web Xpert, we were very pleased with the friendly customer service and comprehensive strategy to get our social website up and running. Thewebxpert is a very professional company, which provided us with a cost-effective project, and they were very flexible in managing changes relating to redesign of certain aspects of the website.

The Web Xpert also provided initial training on how to manage the control panel aspects of the website and how to update the shopping cart system, as well as keeping track of data and statistics for marketing purposes.

We are very pleased with the outcome and would highly recommend The Web Xpert to other companies who are looking to develop a website or revamp an existing one.
